

## Insight#1

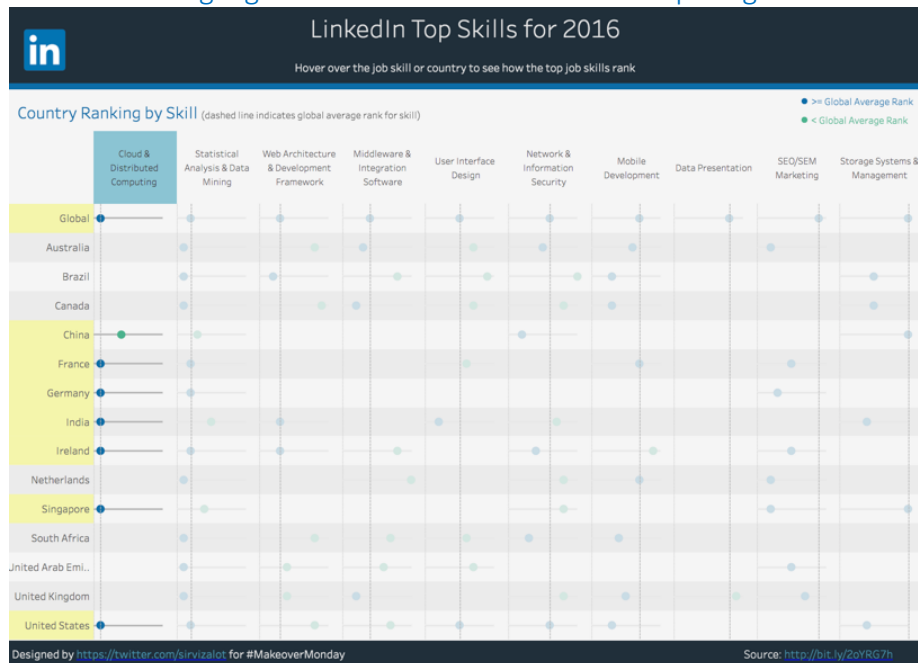

### About the global top skills

From that dashboard , I clicked on global top skills, this showed the global average rank in 2016. Which country has the most a job skill bigger than the global?

## Insight#2

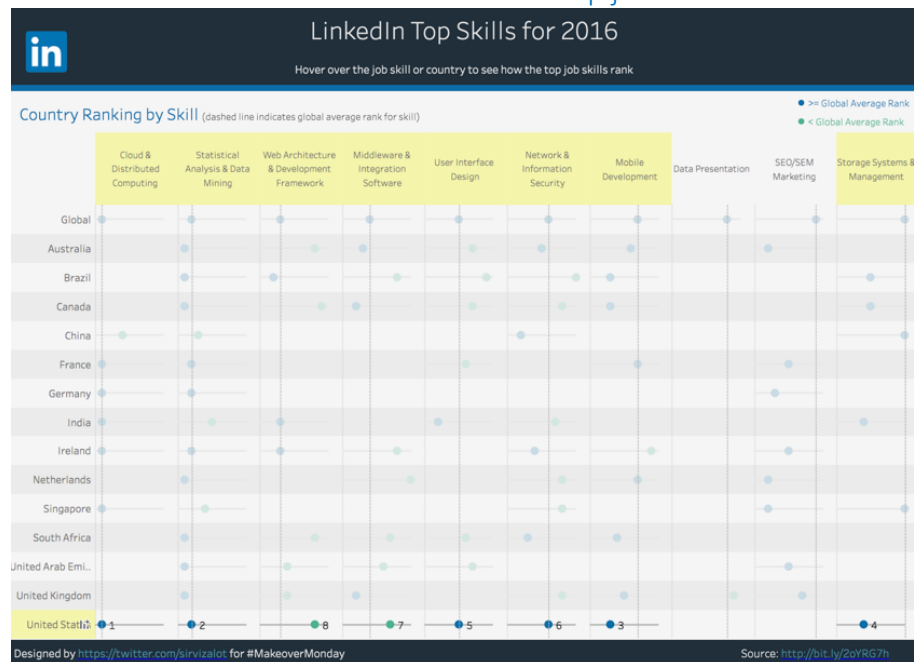

### Highlight on Cloud and distributed computing

I smell a dynasty in the making! Cloud and distributed computing has remained in the #1 spot 2014-2015 and is the Top Skill on almost every list — including France, Germany, India, Ireland, Singapore, the U.S., and Spain. Following closely on its heels is statistical analysis and data mining, which came in #2 in 2015, and #1 in 2014. These skills are in such high demand because they're at the cutting edge of technology.

### Insight#3

#### United states In the top job skills

From LinkedIn Top Skills for 2016 dashboard, I clicked on Data Presentation. It showed that United states is the most country has a job skills and it's bigger than the average in the most skills in 2016 except in web Architecture & Development Framework and Middleware & Integration Software, but in Mobile development and Storage Systems & Management are the highest job skills in US.
